Anesthesia Key

INTRODUCTION. The spectrum of head and neck (H&N) surgery is broad, ranging from simple procedures such as tonsillectomy to precision laryngologic, neurotologic, and image-guided skull-base surgery, complex obstructive sleep apnea (OSA) surgery, sophisticated transoral robotic surgery (TORS), and major H&N cancer

A “neck tuck”, also known as a neck lift, lower rhytidectomy or submental lipectomy, is a surgical procedure to remove excess skin and fat from the neck area under the chin. This area may also be referred to as a double chin. These surgeries are not reconstructive in nature but are performed for cosmetic purposes.
