sudo apt-get update sudo apt-get install python-pip git libffi-dev libssl-dev -y pip install --user ansible pywinrm To run Ansible from source instead of a release on the WSL, simply uninstall the pip installed version and then clone the git repo.

### **Windows Frequently Asked Questions — Ansible Documentation**

Setting up SSH keys By default, Ansible assumes you are using SSH keys to connect to remote machines. SSH keys are encouraged, but you can use password authentication if needed with the --ask-pass option. If you need to provide a password for privilege escalation (sudo, pbrun, and so on), use --ask-become-pass.
