### Biological Science Freeman Second Canadian

Heritability is a statistic used in the fields of breeding and genetics that estimates the degree of variation in a phenotypic trait in a population that is due to genetic variation between individuals in that population. The concept of heritability can be expressed in the form of the following question: "What is the proportion of the variation in a given trait within a population that is not ...

### Heritability - Wikipedia

The second half of the 19th century saw the creation of several women's rights organisations and a considerable activity within both active organization as well as intellectual debate. The 1880s saw the so-called Sedlighetsdebatten , where gender roles were discussed in literary debate in regards to sexual double standards in opposed to sexual ...
