Answers for Chemistry End of Chapter Exercises. 2. Liquids can change their shape (flow); solids can't. Gases can undergo large volume changes as pressure changes; liquids do not. Gases flow and change volume; solids do not. 4. The mixture can have a variety of compositions; a pure substance has a definite composition.

### 1.2 Phases and Classification of Matter - Chemistry

The simplest acid-base reactions are those of a strong acid with a strong base. Table 4 shows data for the titration of a 25.0-mL sample of 0.100 M hydrochloric acid with 0.100 M sodium hydroxide. The values of the pH measured after successive additions of small amounts of NaOH are listed in the first column of this table, and are graphed in Figure 1, in a form that is called a titration curve.
