Floating Structures - A Guide for Design and Analysis ...

Floating Structures: Design and Analysis. Floating houses could be an answer to big-city population problems: cities like London, Tokyo and Shanghai, with plenty of water around and little room to spare, could benefit from this method of building. It could also provide a solution for cities prone to inundations and tsunamis on their coasts - building homes that could withstand sudden floods could prove beneficial.

Floating Structure - an overview | ScienceDirect Topics

The characteristics of drift and slowly-varying loads/motions and its implications to the design of floating structures and mooring systems are then discussed. Approximate formulas for the evaluation of slowly-varying loads/motions are provided. Mooring Dynamics and Design 3-4 lectures are given on this subject.
