The final fission classification is the gas-core engine.This is a modification to the liquid-core design which uses rapid circulation of the fluid to create a toroidal pocket of gaseous uranium fuel in the middle of the reactor, surrounded by hydrogen. In this case, the fuel does not touch the reactor wall at all, so temperatures could reach several tens of thousands of degrees, which would ...

If you own a Ford Focus, for example, some owners have reported success in resolving the code by replacing a damaged fuel injection pump (if that was indeed the cause). However, this may not work for a P0087 on a Ford Fusion—so make sure to perform a proper diagnosis and do extensive research on fixes that have worked for the same vehicle ...

P0087 Code: Fuel Rail/System Pressure Too Low - CarParts.com

Sand cores can be used to form the inside shape of hollow parts of the casting. A metal box (the flask) is used for making the sand mould. It typically consists of two halves to form the top and bottom parts of the mould, termed cope and drag respectively. The pattern is placed in the flask, and then packed with sand mixture forming a mould cavity.
