ENGINE SELECTION Generally, look for a 1600 cc engine from a 1970 VW or later. The engine should have dual-port heads and case savers for the cylinder hold-down studs. VW engines with serial numbers beginning with AE or AK are excellent choices but don't discard other engines because they fail to meet the above criteria.

BUILDING THE 1/2 V.W.ENGINE - Ultralight aviation

Let's go fly on half of a VW engine. This is a 1/2 VW engine. That's right, they cut the engine in half, cutting out the back cylinders and welded the case back together so only two cylinders exist. The purpose of such an engine is for ultralight or very very light aircraft, without spending twice as much money on expensive Austrian two-stroke power.

Let's go fly on half of a VW engine. - Oppositelock

There are various plans available from different sources for converting a full VW engine to a 1/2 VW engine, but they all, including our plans, specify removing the rear 2 cylinders, cutting the crankshaft and cam, and cutting the cylinder heads.

Better Half VW Builders Log . Back to Home Page This is a log of the process while building my ½ VW engine. I used a combination of two different sets of plans. Leonard Millholland's Better Half VW and Scott Casler's Hummel Engine plans. Most of the parts were bought through Hummel Engine.

Better Half VW Builders Log

CHT and EGT are expected to be lower than a 7.5 : 1 half VW thanks to 100% more cooling fin surface area on the cylinders!. This setup will allow for compression in the 9.5 : 1 range in the future. Hoping to achieve 60 hp at 9.5:1. With the bore to stroke ratio of this engine torque numbers should exceed the HP numbers in the 32-3400 RPM band.

Javelina, twin cylinder 95 HP 1/2 VW aircraft engine ...

Bruce Blauvelt is building the Better Half VW engine... We have most of the adaptation parts made and shown in the photo to the left...
