Inside Network Perimeter Security: Stateful Firewalls ...

However, perhaps the biggest challenge to network security is lateral movement. ... the thought of implicitly trusting users inside the perimeter is big mistake.

How IT, Security Teams Can Protect the New Perimeter

To do this in a more secure fashion, you can set up proxy servers to act as go-betweens for the computers inside your network and the servers they talk to on the Internet: kind of like a sentry in the tower of the castle that would relay an outsider's messages to someone inside the castle. The network perimeter is less tangible in an actual ...
