Lameness is an abnormal gait or stance of an animal that is the result of dysfunction of the locomotor system. In the horse, it is most commonly caused by pain, but can be due to neurologic or mechanical dysfunction. Lameness is a common veterinary problem in racehorses, sport horses, and pleasure horses. It is one of the most costly health problems for the equine industry, both monetarily for ...

Lameness (equine) - Wikipedia

Scar; Scar tissue on an arm: Specialty: Dermatology, plastic surgery: A scar is an area of fibrous tissue that replaces normal skin after an injury. Scars result from the biological process of wound repair in the skin, as well as in other organs, and tissues of the body. Thus, scarring is a natural part of the healing process. With the exception of very minor lesions, every wound (e.g., after ...

Scar - Wikipedia

An important aspect to consider is that when debriding wounds autolytically the wound may appear deeper as the necrotic debris is removed revealing the true depth of the wound. Important: Without a ... self-adhesive, non-invasive. Uses: Surgical wounds, lacerations. Examples: Steri-Strips ... subcutaneous fat may be visible, slough may be present.
