Phalaenopsis Care - Home

Water Phalaenopsis Orchids. The best way to know when to water your orchid is when the soil mix is nearly dry. You can check the moisture in the soil by sticking your finger into the soil and see if it comes out wet. In most cases, you'll need to water the orchid plant about once or twice every week.

How To Grow Phalaenopsis Orchids And Care Tips ...

Phalaenopsis are among the low light orchids, but the morning sun is gentle enough on them and will provide enough light for strong growth. Continue to water and fertilize regularly. Summering your orchid outside will work wonders for your plant, but wait until the nighttime temperatures stay consistently above the low 50s Fahrenheit.

What To Do With Orchids After Blooming: 3 Easy Options

The American Orchid Society recommends feeding your plants regularly with a 20-20-20 fertilizer with little to no urea. Another recommendation is to fertilize with quarter-strength, water-soluble fertilizer each time you water your plant. That means use just ¼ of the amount that the label recommends, and mix it with water.
