Planning for Everything Quotes by Peter Morville

Before we can jump into the tastier design details, a good amount of project planning has to happen. From the kick-off meeting to the first design review, there's a ton going on, and the designer should be on top of it all. Design is collaborative. It hasn't always been that way, but the modern designer has more influence (and influencers) than ...

Planning for Everything - A List Apart

Alan Lakin said, "Planning is bringing the future into the present so that you can do something about it now." This is the essence of why planning ahead matters. Many argue that plans do not normally work especially in this fast-paced world where everything is changing so quickly.

Six Reasons Why Planning Ahead Matters - Dream Achievers ...

It's impossible to understand the value of planning for design without grasping the nature of the work. To argue for user research, content strategy, information architecture, and participatory design, we must integrate whyand how.

How to Plan for Design (and Why) - Semantic Studios

Planning has been proven to assist the planner in experiencing an increase in productivity and efficiency in a company or social life. Planning allows for the planner to sift out any distraction towards the original plan and to keep focused on the main plan.

Understanding Why Planning Is Important For Success

Project planning refers to everything you do to set up your project for success. It is the process you go through to establish the steps required to define your project objectives, clarify the scope of what needs to be done and develop the task list to do it. Project planning software is often used to help craft thorough project plans.

Project Planning: Your Ultimate Guide - ProjectManager.com

The floor plan may depict an entire building, one floor of a building, or a single room. It may also include measurements, furniture, appliances, or anything else necessary to the purpose of the plan. Floor plans are useful to help design furniture layout, wiring systems, and much more.

Floor Plans - Learn How to Design and Plan Floor Plans

Daly (1977) states that schedule planning should be 2%, specifications 10%, and final design 40%, of the total cost; however, not much design is done during execution. Similarly, Poston (1985), states that plans and requirements should be 6% of project cost, product design should be 16%, and detailed design 25%.
