Huntington's disease (HD), also known
as Huntington's chorea, is a
neurodegenerative disease that is
mostly inherited. The earliest symptoms
are often subtle problems with mood or
mental abilities. A general lack of
coordination and an unsteady gait often
follow. It is also a basal ganglia disease
causing a hyperkinetic movement
disorder known as chorea. As the
disease advances, uncoordinated ...

Huntington's disease - Wikipedia

Apart from direct effects on the brain, excessive alcohol consumption is associated with increased risk for trauma (i.e., traumatic brain injury) (Alterman and Tarter 1985; Chen et al. 2012), seizures (Eyer et al. 2011; Martindale et al. 2011), and stroke (de los Rios et al. 2012; Suzuki and Izumi 2013), each of which can have effects on brain structure independent of alcohol or each other.

I have a P.H.Eng and I couldn't care less about your suffix...You are less important to me than a PhD. in Poly Sci! If you are a PhD and don't have 3+ specializations you are less than a 2nd year Philosophy major, you are simply worthless to anyone who isn't trying to make you feel better for a 3149167th place trophy....
