The two-phase type deals only with oil and gas, while the three-phase type handles oil, water and gas.

Additionally, separators can be categorized according to their operating pressure.

Low-pressure units handle pressures of 10 to 180 psi [69 to 1241 kPa]. Medium-pressure separators operate from 230 to 700 psi [1586 to 4826 kPa].

High-pressure ...

SEPARATORS: Two phase separators are utilized to separate the gas from the liquid in a well stream. This allows liquid free gas to be diverted to gas sales and/or to be utilized as fuel.

Relatively gas free oil is then dumped to storage or to a treating system for removal of water. TWO PHASE SEPARATORS:

Designed specifically
