To find a value (or values) we can put in place of a variable that makes the equation true. Example: $x + 2 = 7$ The variable is x, when we put 5 in place of x we get $5 + 2 = 7$, and $5 + 2 = 7$ is true, so $x = 5$, and the equation is solved. (Note: if we said $x=6$ then the equation is not solved because $6+2=7$ is not true)

Well, there is a simple way to know if your solution is an infinite solution. An infinite solution has both sides equal. For example, $6x + 2y - 8 = 12x + 4y - 16$. If you simplify the equation using an infinite solutions formula or method, you'll get both sides equal, hence, it is an infinite solution. Infinite represents limitless or ...
